

## Media Information

### **About Us**

- Founded in 2017
- Founders: James Clarke, Craig Parry, Greg Leach
- Headquarters in Vancouver, Canada
- 15+ employees and 6 advisors
- CEO: Greg Leach
- Specialises in business-facing blockchain applications
- Currently applied to the mining sector, with potential for others

### **Who We Are**

Blockhead Technologies is a provider of software solutions and applications that use blockchain technology. Blockhead Technologies specialises in tracking mining supply chains.

Traceability and transparency are necessities in supply chains. With blockchain, supply chains can be tracked end-to-end.

Blockhead Technologies believes in creating a traceable, honest future. That's why we created STAMP™.

### **What We Do**

Blockhead Technologies uses blockchain technology to create business-facing software solutions. Our product, STAMP™, was created in response to a need for traceability in mining supply chains. Blockhead Technologies brings blockchain into real-life applications. STAMP™ is a platform that easily integrates with existing supply chains to provide improved end-to-end visibility.

STAMP™ allows companies to view proven transactions along their supply chain. Blockhead Technologies prioritises trust, visibility and traceability in supply chain management. Our vision is for a world where every supply chain is transparent, sustainable and ethical.

Blockhead Technologies are the leading technology company to bring blockchain into mining. We are a global company, with headquarters in both Canada and Australia. Blockhead Technologies ultimately aims to bring transparency into mining.
